

Guide to integrating the Fabrick Pay by Bank payment method

This guide helps present the Fabrick Pay by Bank payment method correctly, consistently, and effectively within the checkout page.

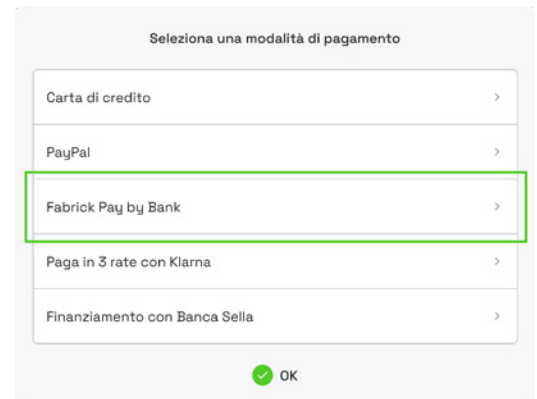

What type of checkout page is used?

✓ Checkout page with text only

To ensure consistency and recognisability, always use the exact wording: **Fabrick Pay by Bank**

Display the payment method name:

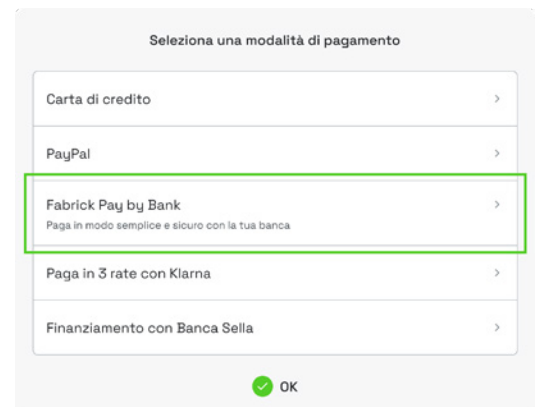

- in the list of available payment methods,
- in the order summary,
- in any payment confirmation messages.

✓ Checkout page with description

If a descriptive text is provided, the following sentence can be added to help users better understand how the payment method works, by explaining the main steps of the payment process, for example:

Pay easily and securely with your bank

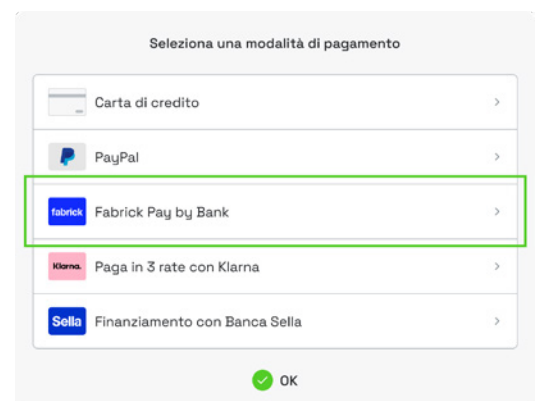

✓ Checkout page with logos

If the payment page allows logos for each payment method, the official Fabrick logo may be displayed:

- Place the logo next to the wording “Fabrick Pay by Bank”
- Ensure it remains legible on neutral or transparent backgrounds
- Do not alter proportions, colours, or apply graphic effects

✗ What not to do

To avoid confusion or uncertainty, avoid the following:

- Do not use alternative wording such as: Fabrick Transfer, Automatic Bank Transfer, or similar;
- Do not change the order or wording of the recommended text;
- Do not include unofficial, altered, or out-of-context logos;
- Do not display misleading descriptions of how the payment method works;
